DEALERS AND DRIVERS MANAGEMENT SYSTEM

PROBLEM STATEMENT:

- Web application where dealers can book drivers through the application for transporting their goods.

- The application is expected to have certain features which are listed down below: There should be 2 types of user logins and signups:

- a. As the Dealer - For new dealer signup, there should be a signup form which will ask the following details - Name, Mobile Number, Nature of Material, Weight of Material, Quantity, City and State. –

- This user can book the drivers from the list of drivers in his dashboard whose interested routes are the same as the dealer's location (State and City).

- For eg: If the dealer's location is Madhya Pradesh-Indore , all the drivers going from/to Madhya Pradesh-Indore should display in the dealers dashboard - Dealers can also search Driver from (State and City) to (State and City).

- b. As the Driver - For new drivers to sign up, there should be a sign up form which will ask the following details- Name, Age, Truck Number, Mobile Number, Truck Capacity, Transporter Name, Driving Experience, 3 Interested routes (From- state and city/To- state and city). - After login, this user can only see the dealers who have booked for his services.

- 1. Login via

- ● Username – password

- 2. Dealer Home screen should show the list of drivers going through the same route as the dealer's State and City which means the dealer should be able to see the drivers who have mentioned the same interested routes as the dealer's State and City.

- 3. Drivers Home screen should show the list of Dealers that have booked them.

Dealers and Drivers Management Website

Step 1:

Installing XAMPP ,download .XAMPP is a release made available by the non-profit project Apache Friends. Versions with PHP 5.5, 5.6, or 7 are available for download on the Apache Friends website. Xampp provides Apache server and Mysql database and others

Then a folder with the name XAMPP will be created under C:\.

Step 2:

After you finished download the project folder and copy the project folder and paste it into the xampp/htdocs folder.

Step 3:

Open xampp and start the apache and MySQL.

Step 4:

Open a browser and go to URL http://localhost/phpmyadmin/ click on databases tab and Create database naming "newrent".

Click on browse file and select "newrent.sql" file which is inside "database" folder and after import click "go".

Step 5:

 Open a browser and go to URL "http://localhost/Dealers-Web/index.php".
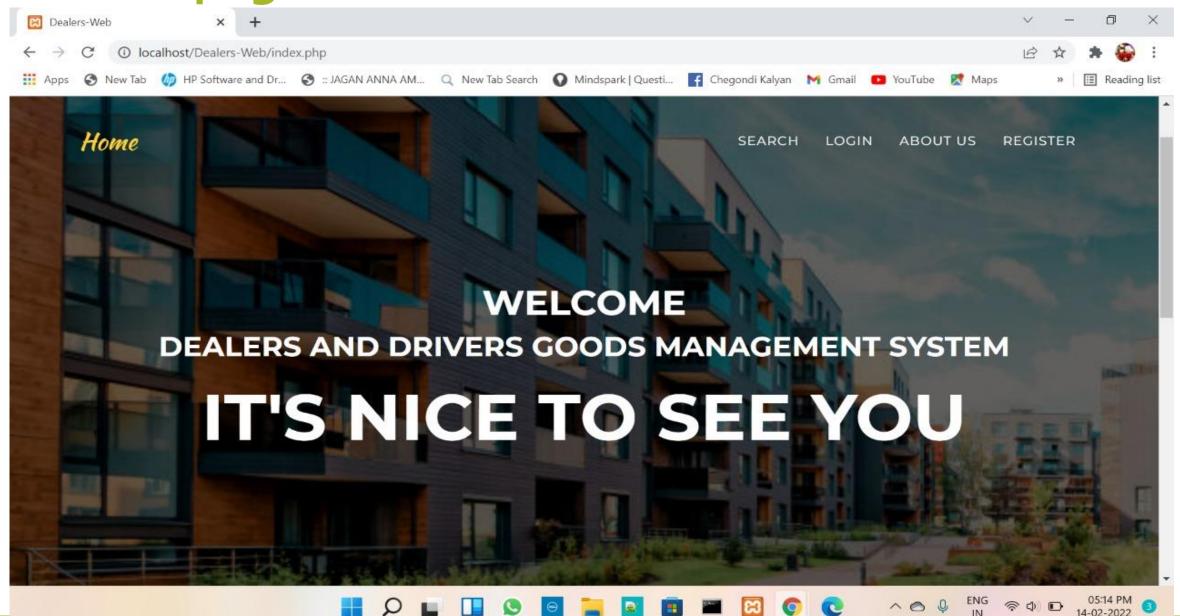

Step 6:

 Final Step Just provide the login detail, it will redirect you to pages.
